

MUNICIPAL REPORT CARD

THE CITY OF TORONTO The City of Toronto election in 2003 was an historical moment for Toronto. Working men and women were finally able to elect a City Council that understood the need to undo the damage of six years of Mel Lastman's government.

The election of Mayor David Miller with a team of progressive City Councillors changed the political power structure at City Hall. We now have elected representatives who are committed to open and accessible government. They oppose contracting out of City services. They want to improve City services across Toronto. New buses, clean streets and affordable services are their priorities.

This report card is issued at the half way point in the mandate of our City Council. We urge you to review it, share it with your members, friends and co-workers. A key part of democracy is making sure our elected representatives remain accountable for their action.
